The National Geologic Mapping Program of Chile SERNAGEOMIN

Felipe Espinoza, PhD

Head of General Geology Department
Servicio Nacional de Geología y Minería – CHILE
November 2023

Overview

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

The Geological Surveys of Europe

1. Sector institutionality and SERNAGEOMIN
2. The National Mapping Program (*Plan Nacional de Geología*)
 - i. Objectives
 - ii. General information
3. Integrated production process of our “Geological Publications”
4. Technical Programs:
 - i. Basic Geology
 - ii. Geophysics
 - iii. Geochemistry
5. Impact and Advances
6. Web Page for divulgation
7. Conclusions

1) OVERVIEW

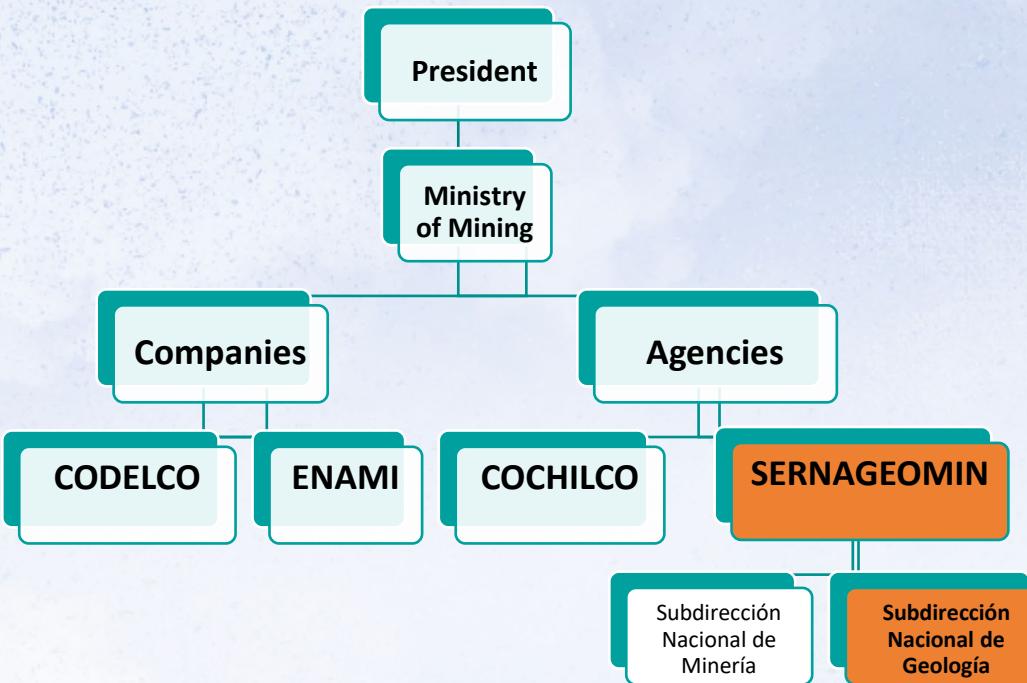

Public Institutions related to the Geology and Mining Sector

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

The Geological Surveys of Europe

Our role:

- ❑ Advise the Government, through the Ministry of Mining, on public policies in topics related to our competences, and
- ❑ Ensure compliance with the safety and sustainability standards of the sector, through:
 - ✓ Mine site oversight (*fiscalización*)
 - ✓ Technical advice
 - ✓ Training
 - ✓ Investigation
 - ✓ Technical publications
 - ✓ Diffusion

2) THE NATIONAL MAPPING PROGRAM (PLAN NACIONAL DE GEOLOGÍA)

General objective

Generate and disseminate geoscientific knowledge of the national territory through three technical programs:

- **Basic Geology (inc. Marine Geology)**
- **Geochemistry**
- **Geophysics**

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

The Geological Surveys of Europe

Specific objectives

- Increase the coverage of geological cartography of the national territory.
- Support the promotion of the exploration and sustainable management of mineral, energy and water resources in the country.
- Provide basic information necessary to:
 - ✓ development of strategic productive sectors (**welfare**)
 - ✓ improve the quality of life of the population (**security**)

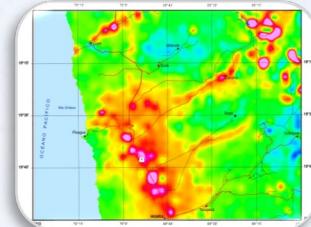

DEPARTAMENTO DE GEOLOGÍA GENERAL - PLAN NACIONAL DE GEOLOGÍA (2010-today)

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

1. Characterization and geological study of the national territory, **basic cartography**
2. Includes first programs for the systematic collection of **geophysical and geochemical data**, on a country scale (in addition to basic geology)
3. **Work team:** 48 geoscientists, 39% postgraduate, women 1:4
4. **“Geological Publications”** as institutional strategic products: databases, cartography (different scales), technical studies, scientific articles, books, atlas
5. Work through **Projects** with annual goals of coverage (km²) or number of publications
6. Association with privates through service contracts (cartography, analytics)
7. Investment in analytical equipment and **Laboratory supplies** and support to transversal units of SERNAGEOMIN.

3) INTEGRATED PRODUCTION PROCESS OF OUR “GEOLOGICAL PUBLICATIONS”

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

The Geological Surveys of Europe

- Geological Publications as an institutional Strategic Product: Scientific products of high technical complexity in their preparation and quality control (peer review)
- Production through an integrated process that involves all SDNG Units
- Certification under a Quality Management system according to ISO 9001:2015

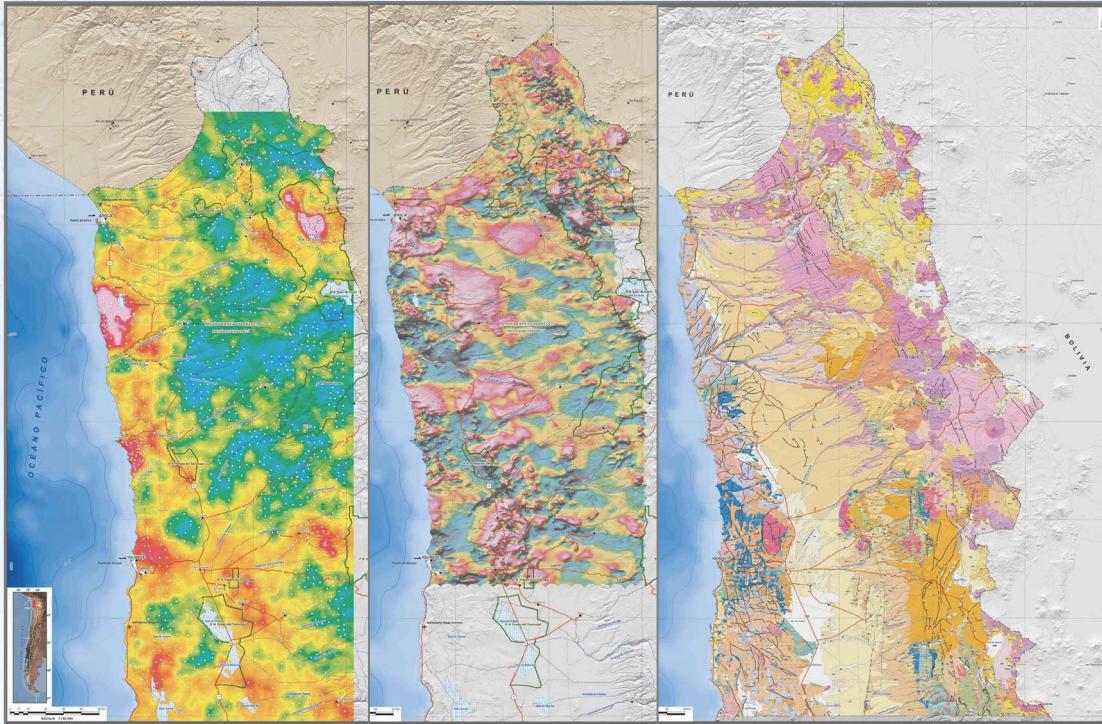

4) TECHNICAL PROGRAMS

ASGMI
Asociación de Servicios
de Geología y Minería
Iberoamericanos

The Geological Surveys of Europe

- Basic Geology**

- Stream Sediment Geochemistry**

- Geophysics (Airborne* and ground)**

Atlas Geológico y Minero, 17°30'S - 21°S,
escala 1:750.000. Sernageomin, 2016

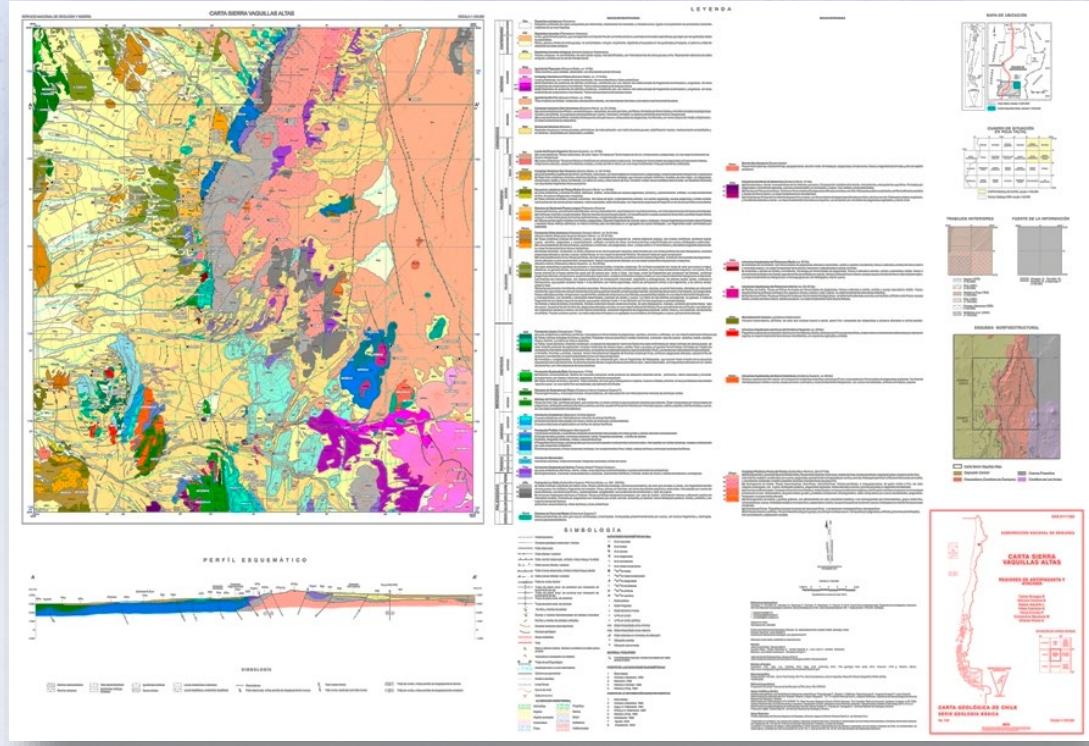

4) TECHNICAL PROGRAMS

BASIC GEOLOGY

Geological map of Chile, 1:1MM.
SERNAGEOMIN (2002)

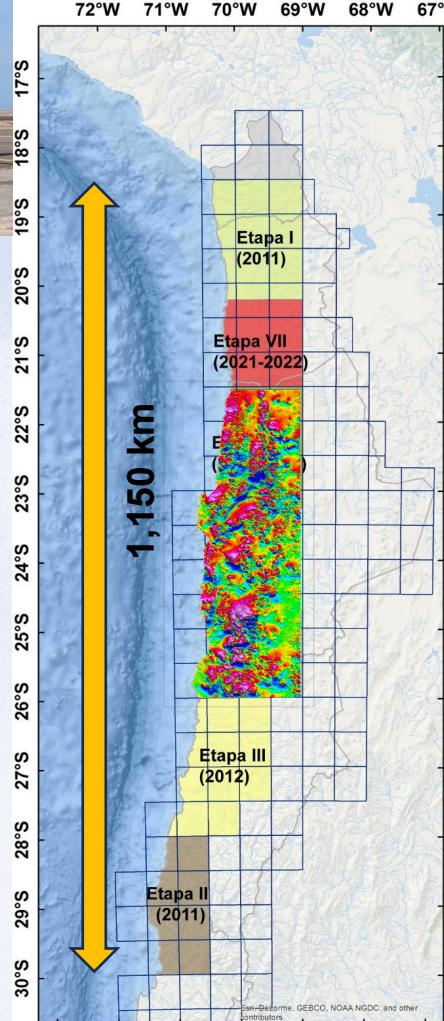

- Charts 1:100.000*
- 50x50 km (~ 2.700 km²)
- Digital data collection
- GeoDataBase* accessible
- Peer-reviewed

4) TECHNICAL PROGRAMS

AIRBORNE GEOPHYSICS

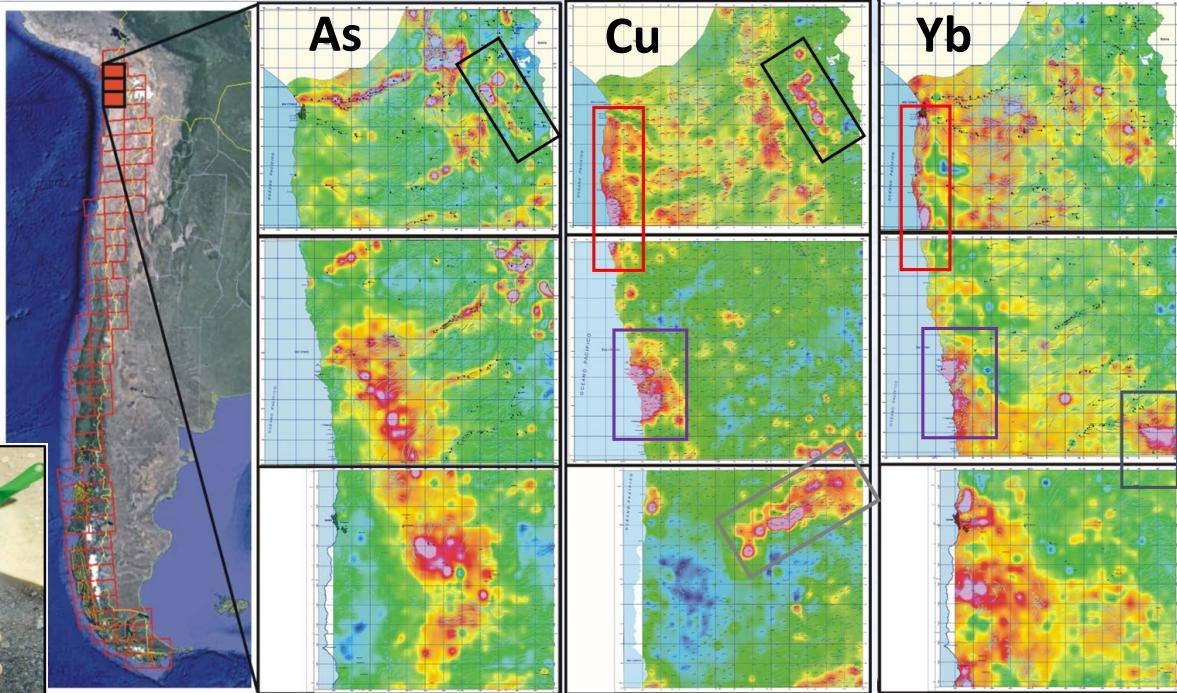

- Collection of magnetic and radiation data in the Northern Chile (18° - 30° S) completed in 2022.
- Seven stages (2011-2022):
 - ✓ $162,000 \text{ km}^2$ (21% Continental Chile)
 - ✓ 383,000 linear km
- 128 new publications (Magnetic and U, Th, K Radiometric charts)
- Full financing by PNG; international public tenders
 - ✓ 4,240,000 USD aprox.

4) TECHNICAL PROGRAMS

STREAM SEDIMENT GEOCHEMISTRY

- Digital data collection (GdB, smartphones)
- Real time on-line storage and cloud update
- Interactive WEBMAPS
- Exploration and environmental applications

The Geological Surveys of Europe

Lauca:

Au - Ag - Cu - As - Sb
Hg - Zn - Pb

Pampa Camarones:
Au - Cu - Mo - REE

Pisagua:

Cu - Mo - Au - REE

Cerro Colorado:

Cu - U - REE

Sagasca:

Cu - Ag

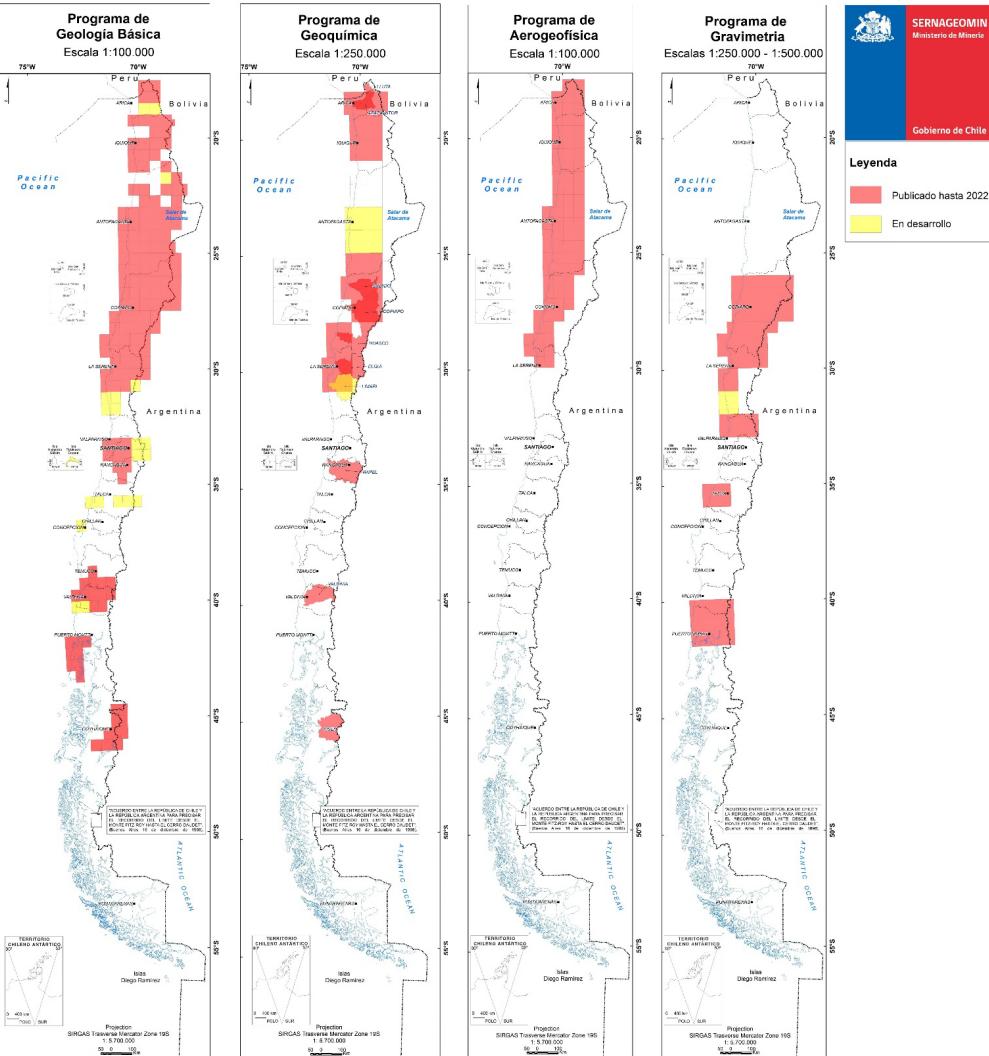

Guatacondo:

Cu - Mo - Ag - Pb

5) IMPACT AND ADVANCES

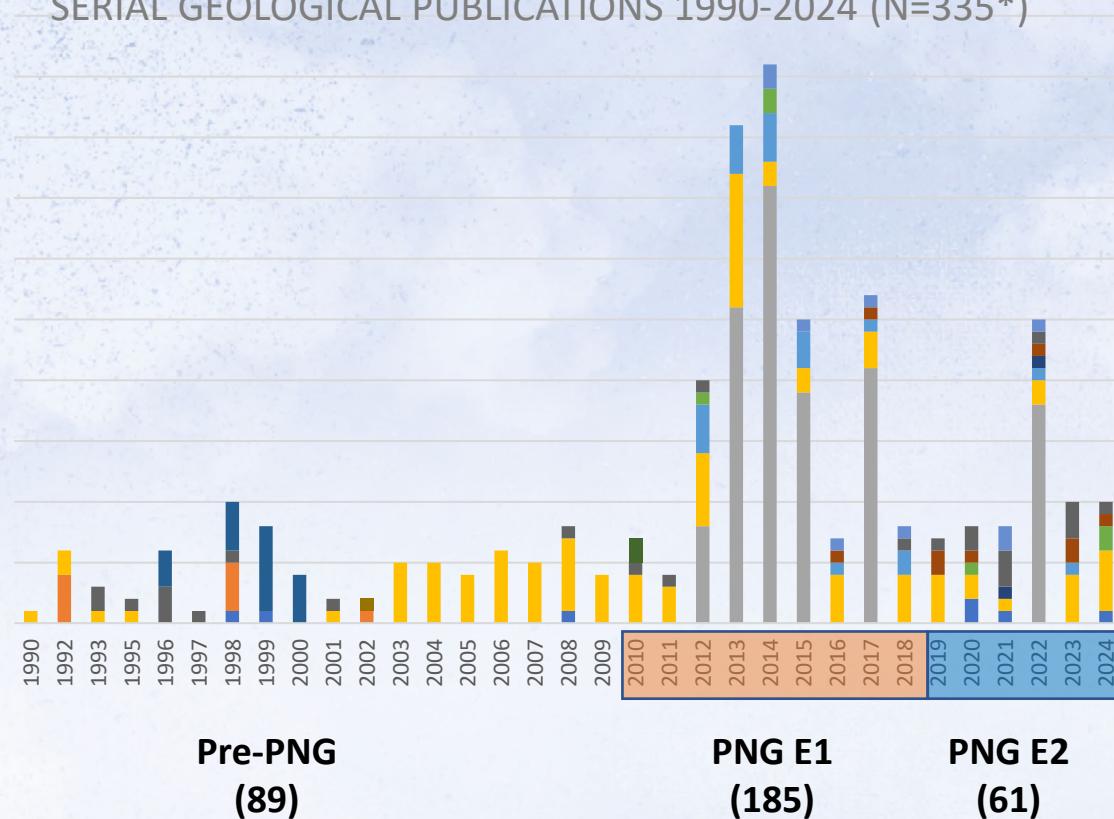

PNG results 2011*- 2022 (*chartography*)

Program	Scale	Coverage Chile cont. [%]
Basic Geology	1 : 1 MM	100 %
	1 : 250 M	87 %
	1 : 100 M	41 %
	1 : 50 M	4 %
Geochemistry (mapa & BD)	1 : 250 M	16 %
Airborne-geophysics (mag., espect.)	1 : 100 M	21 %
Gravimetry	1 : 250 M	
	1 : 500 M	

5) IMPACT AND ADVANCES

SERIAL GEOLOGICAL PUBLICATIONS 1990-2024 (N=335*)

ANNUAL PUBLICATION RATE

The implementation of the National Mapping Program in 2011 has meant, to date, **quadrupling the generation rate of Geological Publications** (in its three technical programs)

* does not consider other non-serial publications or scientific articles

Newsletter #10

Hola!, reanudamos el envío de noticias luego del intenso periodo de verano durante el que completamos numerosas campañas de terreno para levantar los datos con los que estamos trabajando en varios nuevos y muy interesantes proyectos! Hoy les enviamos el décimo boletín informativo con noticias relativas al Plan Nacional de Geología (PNG) de Sernageomin. Gracias por suscribirte a nuestro newsletter, mantente@ a los próximos envíos y sigueños también en nuestras RRSS!
